Information for corporate finance, private equity and M&A research

Research and analyse companies and deals

We have both domestic and international products, and accounts in both local and standardised formats. In many countries we have original filings as well. We've made it simple to search across borders by mapping local activity codes to international codes, and offering various currency and exchange rate options.

Zephyr, our deal database, is compiled by our in-house, multi-lingual teams in the UK and Singapore. Our researchers translate the deal information into English.

Use our current, historical deal information and rumours

Zephyr contains information on an unrivalled volume of deals going back to 2000. It contains information on M&A, IPO, private equity, venture capital deals and rumours. Its deal reports are comprehensive and have integrated company financials and corporate structures. Zephyr has a streamlined search option that's ideal for desktop access/end users and a version for more experienced users. Creating league tables and volume/value tables is very straightforward.

Zephyr includes source documents so you can link to original press releases and statutory filings to backup your research. You can set up alerts to watch deals and companies.

Find companies – generate deal flow

We offer hundreds of search criteria. You can combine these to search for companies that match your profiles. You can search by numerous financial items and ratios including growth rates, activities and products, location, latest news and deal history/rumours plus directors and ownership. And because we have such extensive coverage of private companies you can find information on companies of all sizes.

Do a detailed analysis of a company, including financial analysis

We have very detailed financial information on companies. We also have powerful software that helps you analyse companies quickly and benchmark them against peers.

Get company financial data and multiples for company valuations

We have a wealth of historical financial and deal information. We include deal multiples and various deal values where available and we have a modelled enterprise value when the value's not provided. It's easy to find deals that are relevant to your research – you can search by deal or company characteristics. And you can use our "find similar deals/companies" option to expand your searches. We have multiples and financials pre and post deal.

Valuation Catalyst pulls data from our products and pushes it through various models to give you a range of robust valuations.

Information on corporate structures – directors, owners and subsidiaries

Our ownership information is exclusive to us and is compiled by our in-house team. It's the most comprehensive source of group structures available. It's widely used in a compliance context to research beneficial ownership for client on-boarding and know your customer checks.

Pull data into your own models

Using our Add-ins you can pull data from our products into your own pre-formatted spreadsheets and models. You'll always be using "live" data and you won't have to do any manual inputting or re-keying.

Create Pitchbooks

Our Add-in for PowerPoint is designed to help you use data from our products in your Pitchbooks. Pull "live" data into your PowerPoint templates, without re-keying.
